3F Filippi

TARGETTI

DURA
LAMP

Since 1952, 3F Filippi S.p.A has been a benchmark in the field of efficient technical lighting fixture design and manufacturing.

The products, which are designed and created exclusively in the Pian di Macina - Pianoro (Bologna) facilities, are an expression of the company's ability to combine the traditional and the modern, craftsmanship and technology, appearance and functionality, and efficiency and sustainability.

Targetti has been designing and producing indoor and outdoor architectural lighting fixtures since 1928.

For over ninety years, its products have been illuminating prized artistic and architectural works throughout the world and are the expression of innovation, research, and attention to detail.

The company has always placed its experience and expertise at the disposal of architects, designers, and professionals in the lighting world.

With decades of experience and solid technical skill, Duralamp offers a wide range of high quality and efficient products.

Thanks to its expertise, it selects the latest generation components, engineering reliable products, with an offer that includes sources, LED strips, and lighting fixtures.

An Italian company open to the world

Founded in Florence at the beginning of the 1980s as the Luminous Springs division of Targetti Sankey s.p.a., in 1982 Duralamp became independent and began to develop in the manner most congenial to it, with an emphasis on product engineering and the improvement of technologies and production processes.

The implementation of these processes and methodologies took shape at the beginning of the 2000s, on the one hand with the acquisition, in Joint-Venture, of a production site in China, and on the other hand with the development of reliable and long-lasting partnerships with other leading production realities both in Europe and in the East.

Duralamp is part of the 3F Filippi Group | TARGETTI. The recent acquisition by 3F Filippi has made it possible to develop synergies of great interest, and allowed the Group to structure an extremely varied product portfolio. The breadth of range, production capacity and customer response has now multiplied and is able to meet both the needs of Electrical Equipment Distribution and those of Specifiers and Buyers, Architects and Lighting Designers, at a global level.

Mission and Vision

We believe that by providing the best products at the best prices it is possible to build a relationship of trust with customers that lasts over time.

Why do we believe we can do it? Because restructuring Standardised commodity products and finding the right balance of quality or even 'forging' light to meet the particular needs of an installation to us is a source of great professional satisfaction that turns into customer service.

In a wider Vision we work to make a positive impact on people's lives with lighting environments that have never been seen before in terms of quality and usability. While paying attention to containing both design and production costs, we are committed to using cutting-edge technology to create a new dimension of light quality and control to place users at the centre of their choices.

Technological evolution

The entire world of mass produced “light fixtures” has changed: today the request is for “lighting solutions” that are differentiated according to uses and areas of application. Duralamp is able to provide both a range of retrofitting fixtures and commodity lighting fixtures (Panels, Led, Hi Bay, Batten, Projectors etc.) as well as LED strips and power supply systems and intelligent control systems (Smart Building). Our product improvements are dedicated to making a difference to the lifespan, emission stability over time and full compliance with requested parameters: they may not be visible but it is their effectiveness that interests us. In a world in continuous evolution we manage to maintain control over production and the choice of components to produce products with a quality/price ratio that can meet the different needs of the market.

Custom-made products

The majority of products distributed worldwide are those that appear in catalogues that are differentiated according to reference markets. Yet it is custom-made products that give us the most satisfaction and allow us to put into practice all our expertise and technical ability... To satisfy particular requests from specifiers, lighting designers and architects we are able to provide 'custom-made' products, engineered, designed and built with the care a tailor puts into a made to measure shirt...

Where can you find us?

In many areas Duralamp is present with direct sales representatives able to propose solutions and provide technical support for the choices made by Specifiers. The company can also rely on a network of Distributors who manage their respective local markets with stock and pre-sales and after-sales services. This extensive and varied commercial network is a real asset that complements the international structure of the various branches in the Group. The network Duralamp operates through is really extensive and allows them to participate actively and effectively in projects in different countries around the world, in Europe, the USA, South America and the Far East.

More details on www.duralamp.it

Why choose Duralamp

Duralamp has a great advantage: a streamlined and flexible structure ready to study technology to improve existing solutions or discover new ones. Four decades of first-hand experience in production sites in China, an onsite engineering team, constant research into the most suitable materials, the most effective industrial processes, monitoring and controlling all production processes and cutting edge technology in our production sites both in Italy and abroad... all allow us to provide the expertise that has allowed us to successfully conclude high-level projects around the world. Of course in addition to daily operations that are subject to ISO 9001 Certification Quality Standards.

All Duralamp products conform to all European Directives and where required have obtained Quality and Safety marks from other countries:

SIMPLY LOADED WITH INFORMATION

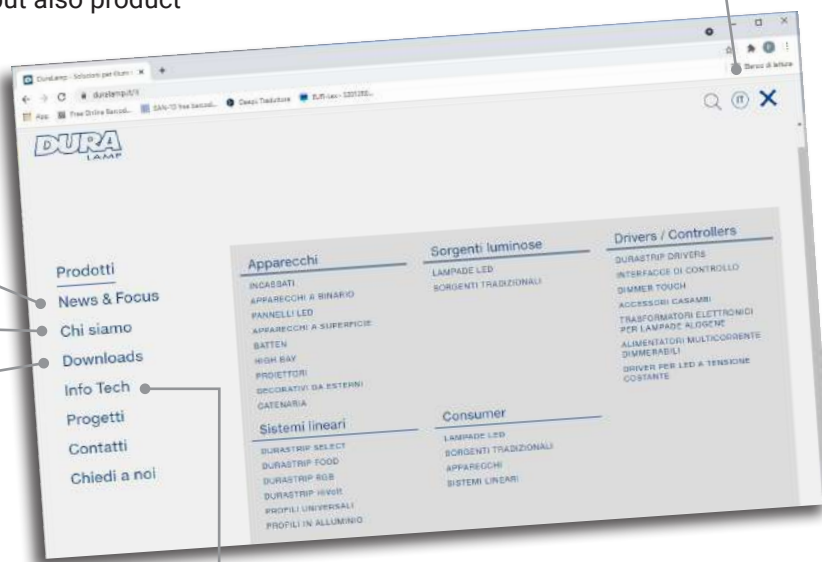

We have built a site with a **simple and intuitive structure**: to find the **information you are looking for immediately!**

Discover the tools that customers, specifiers, lighting designers and the worldwide sales network need to be convincing and successful in the way that suits us best: **with fairness and transparency.**

the website and datasheets are available in **English, French, Spanish and German***.

Ask the company for information

Tipologia
Apparecchio da incasso rettangolare per due lampade orientabili con attacco GU10.

Caratteristico
Ampiamente utilizzato nelle installazioni del settore retail, soddisfa le esigenze di chi preferisce un apparecchio da incasso a soffitto per lampade sostituibili.
Offre il vantaggio della multidirezionalità e dell'orientabilità del fascio luminoso da +15° a -15° sul piano verticale.
Alloggia lampade PAR16; compatibile con tutte le lampade GU10 del catalogo Duralamp.
Max 30 W.

Installazione
Ad incasso con le apposite molle in alluminio zincato.
Completo di portalamпада GU10.

Materiale
Corpo in alluminio verniciato nero con cornice color argento.

Green Quest - a journey towards environmentally friendly methods and processes

A 'green' mindset cannot be improvised.

At Duralamp, we have been working every day for decades to make our products ALWAYS MORE EFFICIENT, for real energy savings that can be seen from the very first days of use.

Energy saving is a fundamental point, but equally important are optimisations aimed at limiting the consumption of non-renewable raw materials. The right balance between product quality and the careful choice of raw materials, the weight and consistency of plastic materials where irreplaceable, the rationalisation of work processes aimed at reducing consumption in production, improving the environment and the lives of people working. Greater efficiency at all stages of processing to reduce the energy consumption needed to obtain the same result while avoiding waste: we are constantly working in this direction.

A battle fought chip by chip and shipment by shipment to improve the environment in which we all live.

Because the future is now.

We have chosen.

to engage at various levels:

- | | |
|------------------|--|
| Corporate | <ul style="list-style-type: none">• Optimization achieved thanks to the new Group Data Centre• Use of paper from FCC Forests for catalogue printing• Separate collection at all levels, recycling and reuse wherever possible: the pillars of the green economy! |
| Product | <ul style="list-style-type: none">• Use of recyclable raw materials: commitment to increase their up to 90% of the components.• Packaging made from 70% recycled paper.• External packaging from FSC forests.• Study of products that go beyond the concept of disposable equipment, returning to a wise concept of equipment to be reused, to reduce the consumption of materials and allow the use of products over time. |

we have also chosen to act on...

packaging. Packaging is one of the highest volume of 'wasted' materials, and therefore a commitment, for municipalities around the world.

The ECO packaging programme of Duralamp has:

- ✓ totally eliminated plastic film on pallets in favour of  recyclable film
- ✓ replaced plastic adhesive tape in favour of  paper tape
- ✓ eliminated plastic protection pads in favour of recycled paper  recycled paper filling material

* Polystyrene and PVC fillers have been phased out, with rare exceptions.

We have chosen...

to 'rethink' how we produce our products. The right direction is to have more and more items built for long life use, that can be used again and again, and again...

RETHINK

REDUCE

REUSE

RECYCLE

Replaceable lamp luminaires are

**perfect for re-use and
reduces the amount of
materials needing to
be disposed of**

Previously unimagined lumen/watt
efficiencies allow lamps to

**significantly reduce
energy consumption**

Highly popular Lamp Sources and Professional
Fixtures with exceptionally long service lives
means

**investing in technology
for the benefit of the
ecosystem**

DURALAMP and the GREEN packaging revolution:

**DURALAMP contributes to a cleaner world ...
while ensuring safer shipments.**

Together with a leading company specialized in paper packaging, we studied some packaging solutions that guarantees a safer shipments of our products, while pursuing our desire to actively contribute to the elimination of plastic materials in favor of recyclables.

The 120x80 pallets packaging includes a high cardboard box, SUPERBOX, with central loading; a 'hood' in compostable material* to replace the shrink plastic film, and a strap, instead of the plastic adhesive tape.

With this new palletization, products with a height of up to 170 cm (e.g. tubes) will be shipped vertically, fully protected inside a package complete with a robust closing cap. To better protect shipments, 'no overlapping triangles' will be placed on all pallets less than 2 meters high to prevent other goods to be stocked on top and risking to damage our products.

SUPERBOX: The standard height is 1 meter but there are many packaging options...

protective cap made of compostable and biodegradable material*: replaced heat-shrinkable plastic film saving kilometres of plastic per year

'no overlapping triangles' will be placed on all pallets less than 2 meters high to prevent other goods to be stocked on top and risking to damage our products.

compared to tape, straps are less in quantity and allow correct paper recycling

* Compliant with EN13432 with OK COMPOST certificate n. TA8011400928, issued by TUV Austria on 13/08/2018.

LED TABLE LAMP

NEW

PLUS

MARAMA

MARAMA

MARAMA

MARAMA

TYPE

LED table lamp, dimmable and cordless.
Elegant and essential design, perfect for both modern and classical settings.
Diffused light directed downwards.

CHARACTERISTICS

Marama is produced in three versions, all dimmable: warm colour temperature (3000K) and two options of changing the temperature of the light from warm to natural (2700K-4000K and 1800K-4000K).

Marama is operated by a touch on the top of the diffuser: the touch activates on/off and light intensity.

Models with a choice of colour temperature, the same 'touch' allows you to select the desired temperature.

Battery: battery life of up to 12 hours at full light output and up to 5 days at the lowest output.

Equipped with large capacity 6600mAh rechargeable lithium battery.

Charger USB C not included.

Battery charging time: 5~6 hours.

MATERIALS

Powder-coated aluminium; frosted polycarbonate screen.

REAL LUMENS

Luminous Flux Data is REAL. Values are measured on actual use conditions. Nominal values of the LED source are not stated.

LESELI DOWNLIGHT SC

TYPE

LED source with SMD technology and high efficiency chip integrated into a recessed luminaire.

CHARACTERISTICS

Soft satin effect polycarbonate anti-glare diffuser.
Flicker Free.

MOUNTING

Complete with springs for easy fastening into false ceilings. Cable (1 m) with IP65 quick connector.

MATERIALS

Thermally conductive body; extremely light and manageable.

**FLICKER
FREE**

Providing greater visual comfort, improved definition of detail and reduction of stress.

HELIOS IP65

TYPE

High efficiency SMD LED source integrated into a Class III IP65 downlight fixture.

CHARACTERISTICS

IP65 fixture both optical/front side and the back/component side; IP20 remote driver included in the package.

MOUNTING

Complete with springs for easy fastening into false ceilings. Cable (1 m) with IP65 quick connector.

MATERIALS

Aluminium finned dissipation body.

REAL LUMENS

Luminous Flux Data is REAL. Values are measured on actual use conditions. Nominal values of the LED source are not stated.

HELIOS UGR RECESSED FIXTURES

TYPE

LED source with COB technology and an integrated high efficiency chip in a low glare UGR recessed light fixture.

CHARACTERISTICS

The deep recess of the light source combined with the advanced lens technology ensures glare ratings from UGR<11 to UGR<19. Applications include offices or places of work where computer screens are used and low glare is essential. A sealed light source provides easy maintenance and cleaning.

MOUNTING

Quick coupling system to false ceilings using springs.

MATERIALS

Aluminium body; extremely light and easy to manoeuvre.

FLICKER FREE

TRACKLIGHT

PLUS

DURA BEAM TRACK LIGHT

Essential design, the classic cylinder, perfect in any interior. A best-selling range in the retail sector today with 50,000h lifetime and a new power: 40W, 3700 lumens and 7500 cd.

PRO

PROJECTOR DURA TL

Distinctively designed projectors in extruded aluminium. Aperture of 24° on low power and 40° for higher powers. A high-profile range for prestigious installations. 50.000h.

EUROSTANDARD PLUS

New codes but same options and accessories. The standard track version has been revised to achieve an optimised section and offer an even more elegant profile.

DURA BEAM - TRACK LIGHT

Die-cast painted aluminium body.

Integrated electronic driver.

The graduated ring opens by unscrewing and the lens can be replaced with a click.

Optimised optics for power.

The centre of gravity always remains in axis with the track irrespective of where the projector is aimed.

Cylindrical section and very small diameter:
50 mm 60 mm 80 mm

12W 20W 30W/40W

Can be equipped with several 'beam-cutting' accessories to meet different project needs:

DURA BEAM - TRACK LIGHT

TYPE

Professional LED projectors for track mounting.

CHARACTERISTICS

Same shape with 3 different dimensions and 4 power choices to cover all requirements. Can be used with Eurostandard Plus tracks as well as with other brands': Staff, Nordlux, Nordic, Global, etc.

OPTIC

High efficiency **Ra>90** LED Chip on Board.
Precision optics with dichroic effect lens.
Adjustable from 0° to -90° on the vertical plane and 350° on the horizontal plane.

MATERIALS

Die-cast painted aluminium body; black or white colour.

MOUNTING

Onto an electrical track in 3 phases; fixtures equipped with a safety lock to fix to the tracks.

NB

Non Dimmable.

POWER SUPPLY

Electronic driver integrated in the fixture body.

EUROSTANDARD PLUS

TYPE

System is a 3 phase mixed system with two additional conductors intended to manage a general data signal (for example DALI, DMX). Electrified track in three lengths in extruded anodized aluminum or in extruded painted aluminium. Conductors in copper insulated in PVC.

MOUNTING

There are three possible installation systems: directly on false ceiling (using the needlepoints on the track and the suspension kit), on ceiling using a metal clip or hanging by a mounting kit.

POWER SUPPLY

Frequency: 50Hz.

Rated current and voltage: L1/L2/L3/N/ground 16A/440V + D+/D- 2x1A/50V FELV AC (DALI).

Phase / phases power: 3,6kVA / 10,8kVA.

ELECTRICAL SCHEME

During the wiring the electrical scheme of picture must be followed.

LOAD SCHEME

INSTALLATION

There is a polarity on the lighting track to guarantee the right connection of the multiple pieces of the track. Also end-feeds and connection joints have a polarity that must be taken into account in order to choose the right component. In the catalogue sketches of these articles, the position of the polarity is highlighted with a red line.

SO MANY OPTIONS WHEN CHOOSING A PANEL? FIND THE FEATURES YOU YOU NEED!

Sidelight LED PANELS SL: SIDELIGHT

Side Light technology is widely used in the production of LED panels. The light emission comes from the profiles embedded in the frame and is reflected uniformly on the surface of the front screen. The advantage is a very light panel with a thickness of just a few millimetres.

**25000h
G2**

**35000h
G3**

**50000h
G4h24**

BACKLIGHT PANELS BL: DIRECT LIGHTING

The positioning of the LEDs on a horizontal plate parallel to the screen guarantees uniformity of illumination and excellent efficiency.

The rear compartment, a few centimetres thick, is functional to housing the backlighting and optimising heat dissipation.

- BASIC: high-transmittance PMMA primary optics.
- SLIMFLUX BL - BASIC: 6 pieces pack with single items' protection plastic bag.
- New efficiency upgrade to 30W from next autumn.

• Minimum Order Quantity

NOTES:

- Insulation Class I panels cannot be made dimmable by changing the driver nor can they be used with the ballast for stand-by lighting.
- Pay attention to the thickness of the backlit panels. In these panels the driver is recessed between the rear compartment and the edge of the panel and does not extrude from the total thickness shown in the table.
- When installing BL panels with a surface frame, using dimmable drivers or backlighting drivers, it is necessary to order the frames with a height of 8 cm.
- The one-piece frames are equipped with a rear bracket to be fixed to the ceiling. Kit frames are fixed directly to the ceiling: the panel is slid inside the three sides already fixed before closing.

UGR<19

The diagram illustrates the color temperature scale for LED lighting. It features a horizontal bar with a color gradient from yellow (left) to blue (right). The bar is divided into three sections: 'WARM WHITE' (left), 'NATURAL WHITE' (middle), and 'COOL WHITE' (right). Below the bar, three temperature markers are indicated: '3000K' at the left end, '4000K' at the boundary between Natural and Cool White, and '6000K' at the right end. A hand is shown turning a rotary switch, which is positioned over the 'NATURAL WHITE' section, specifically pointing towards the 4000K mark. The switch has a circular face with several positions, and the hand is in the process of selecting one of them.

- High transmittance optical PMMA screen.
- Double emission upwards and downwards.
- SLIMFLUX ROUND - PLUS: 5 pieces pack with single items' box.

The power cable is one with the suspension cables, therefore invisible.

Light is diffused from the fine white frame to the methacrylate panel. Fractioned by micro incisions on the panel light is directed predominantly downwards. 30% of the light is projected upwards to create a striking effect that adds to any classic or modern environment.

NOTES:
The Round Translucent Up&Down panels are complete with suspension cables and driver integrated in the ceiling rose. Maximum suspension length 150 cm.

DIMMABILITY

Can be used with 0-10V dimmers

SLIMFLUX ACCESSORY

TYPE

Frames for mounting LED panels on ceilings.

CHARACTERISTICS

Make it possible to use SLIMFLUX panels in ceilings where there is no possibility to install recessed panels; frames can hide the drivers.

MATERIALS

LPLAF060/120: painted sheet metal. Other models in mounting kit: extruded aluminium. White colour.

NB

The LPLAF060 and LPLAF0120 models are installed using surface fixing brackets. Other models in mounting kit: the frame fixes directly to the surface. Screws and plugs supplied.

Slimflux 60x60: surface mounting with the frame.

Colou light effects

+ DuraSmart = SMART LIFE!

The DURABLE line, luminaires for replaceable light sources, is perfect for taking advantage of the flexibility in light colour, and thus room perception, offered by the DuraSmart line of lamps.

So the pendant on the restaurant table can have cool white light for lunch and warm light for dinner, the spotlights in a shop window can emit light of any colour, for fixed or dynamic settings simply set by a smart phone.

Cool white and warm white light depending on the time of day, to support the correct circadian rhythm.

System compatible with iOS 8.0 or higher; Android 4.3 or higher.

DURABLE

LED light sources have very long lifetimes compared to lamps of the past. Technology now makes it possible to create luminaires complete with light source at previously unthinkable costs, for all kinds of applications.

Alongside these, we want to activate new product lines where you can change the source, so that they last over time....

DURABLE - TRACK SPOT FOR GU10

TYPE

Professional LED projectors for track mounting with GU10 lampholder.

CHARACTERISTICS

Can be used with Eurostandard Plus tracks as well as with other brands': Staff, Nordlux, Nordic, Global, etc.

OPTIC

Can be used with all GU10 lamps in the catalogue: select the desired power and beam opening.

MATERIALS

Die-cast painted aluminium body.

MOUNTING

Onto an electrical track in 3 phases; fixtures equipped with a safety lock to fix to the tracks.

BATTEN BT3

Designed for environments where diffused lighting and elevated visual comfort are required.

IP65 rapid connection

Impact resistant extruded polycarbonate

Can be used in series of up to 22 fixtures for the 18W model, 11 fixtures for the 34W model and 7 fixtures for the 50W model.

BATTEN BT3

TYPE

Linear ceiling fixture equipped with high efficiency LED sources. Fitted with a quick spring clamp for connection in series.

CHARACTERISTICS

Quick opening mechanism for wiring. Easy to connect in series thanks to the quick spring clamp supplied.

Can be used in series of up to 22 fixtures for the 18W model, 11 fixtures for the 34W model and 7 fixtures for the 50W model.

MATERIALS

Polycarbonate body: opal polycarbonate screen equipped with internal fins for flow recovery and emission optimisation.

ASSEMBLY

AISI 316 stainless steel 'snap on' bracket to anchor to the ceiling or to be used to suspend the fixture.

Every batten is equipped with brackets.

Adjustable suspension cables available as a separate code.

APPLICATIONS

Supermarkets, car parks, laboratories, warehouses.etc.

• Minimum Order Quantity

HB3 - HIGH BAY

Minimum thickness;
onboard driver

HB3 - HIGH BAY

TYPE

Suspension fixture for installations in large commercial and industrial spaces, equipped with an aluminium reflector with a 110° beam opening.

CHARACTERISTICS

A monoblock body just 4,5cm thick. The entire body of the fixture is laminated to optimise heat dissipation. Integrated power supply, solid structure suitable for use in difficult situations. Free-wire cabling. Replaces discharge lamps up to 400W.

MATERIALS

Powder coated die-cast aluminum body.

APPLICATIONS

Professional lighting ideal for industrial environments and large indoor spaces.

Optimised design to maximise heat exchange

Water flows away along the cooling fins

HBL - BEATRIX LINEAR HIGH BAY

BASIC

Glass

PRO

Tridonic Driver

Glass

HBL PRO can be used in series of up to 10 fixtures for the 40W model and up to 6 fixtures for the 80W model.

QUICK CONNECTION
WITHOUT TOOLS!

HBL - BEATRIX LINEAR HIGH BAY

TYPE

Suspension fixture for installations in large commercial and industrial spaces; uses SMD technology.

CHARACTERISTICS

Fixtures with single optics to maximise flux. The collection is divided into versions with standard drivers and those with Tridonic drivers. HBL PRO can be used in series of up to 10 fixtures for the 40W model and up to 6 fixtures for the 80W model.

OPTIC

Optical systems composed of micro optics that direct the flux of the LED sources. The LED sources are protected by sealed optics to be used in dusty or dirty environments.

MATERIALS

Extruded PC body; glass front screen.

MOUNTING

Easy cabling using an IP65 connection box attached to the body of the fixture. Wall/ceiling installation with the brackets supplied or suspension mounted. The fixture is equipped with a 1m suspension cable. The separate accessory code for suspension installation includes 3m length cables.

PANTH - SL2

PANTH - SL2

TYPE

LED projector for outdoor, indoor and construction site application.

CHARACTERISTICS

Compact dimensions: easy to use and handle. Equipped with fixing bracket, adjustable on the vertical axis. Free wire for professional use (1.5 m long). It can be connected to motion or twilight sensors.

MATERIALS

Grey painted pressed metal body. Completely sealed IP65 driver.

NB

Non Dimming.

THE 200W MODEL CAN ALSO BE USED AS A HIGH BAY: 400 LUX AT 5 METRES HEIGHT.

Optional lens:

The optional aluminium reflector provides direction the light: ideal in the workplace where video terminals or machines with LCDs are used, the antiglare optic prevents light from being reflected on screens positioned under the fixture.

HB2 - HIGH BAY

TYPE

Suspension fixture for installation in large commercial or industrial spaces; it uses SMD technology. Also available in a DALI version.

CHARACTERISTICS

It is composed of an independent power supply system connected to the body of the fixture with small columns for improved thermal management. The optical unit is integrated into the aluminium body for perfect heat dissipation. The fixture body can be completed with an aluminium or polycarbonate reflector to obtain a different aesthetic and antiglare effect.

OPTIC

The optical system is composed of an array of SMD optimised lenses with a beam opening of 90° for the 100W and 150W and 120° aperture for the 200W.

MATERIALS

Grooved die-cast aluminium for heat dissipation.

ASSEMBLY

Equipped with a mounting ring for suspension installation. For ceiling or wall installation order the accessory code that comprises the bracket and the relative accessories.

To obtain a more attractive aesthetic and reduce glaring the luminaire can be completed with an aluminium or a transparent polycarbonate reflector.

PANTH ST

High power items are equipped with a GORE-TEX® valve to compensate for pressure variations due to thermal changes and to prevent the formation of condensation in the fixture.

PANTH ST

TYPE

High power, ultra-thin LED projector; can be used outdoor and indoor.

CHARACTERISTICS

It can be connected to motion or twilight sensors.

MATERIALS

Painted diecast aluminium. Black and white colour.

NB

Free wire for professional use. Models from 100W upwards are equipped with a compensation valve.

PRO

MINILINI IP65

MINILINI, the linear outdoor lighting from 30 cm to 120 cm, now available with two beam angles, 110° and asymmetric 36°x80°. A quality product for important projects.

PRO

JAZZ IP65

Jazz, a projector with narrow optics for more precise lighting, is made of powder-coated anodised aluminium. For outdoor and underwater

PROJECTORS

Outdoor and underwater DMX-controlled SUBAQ RGB projectors.

PLUS

SUBAQ RGB IP68

MINILINI IP65

MINILINI allow to create a continuous line of light.

The IP65 wiring is located underneath the luminaire.

MINILINI IP65

TYPE

Mains voltage architectural linear projector for surface mounted installation.

CHARACTERISTICS

It is constructed from extruded aluminium with an opal polycarbonate cover and is rated IP65 making it suitable for exterior environments: 40 mm wide and 295 or 585 mm long and available in various beam angles and wattages.

Accessories include a selection of fixed and angled surface mounting brackets providing installation uniformity or adjustable brackets for further flexibility.

MINILINI is complete with integrated protection from voltage spikes.

DIMMABILITY

230V: Dimmable 10-100%; TRIAC Leading edge

CONNECTIONS

Maximum connection length: see table.

ASSEMBLY

Choice of surface mounting brackets with different fixed angles - 15°, 30°, 45° - or with adjustable brackets of different heights to be ordered with separate codes.

BINNING

ANSI/SDCM: 2 step.
3000K - 4000K

120° opening

36°x80° asymmetrical lens

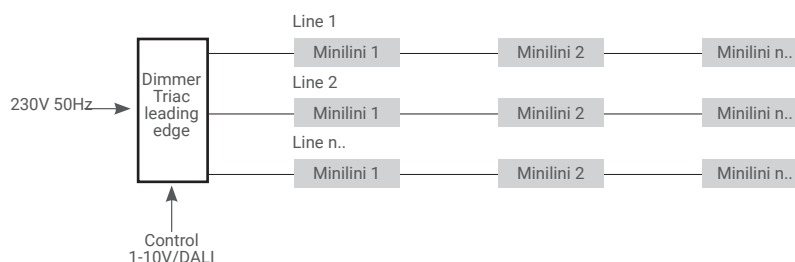

Driver on board

Steel brackets of different heights

Converter Wiring Diagram

JAZZ PROJECTORS IP65

Precision multifaceted optics.

25° - 60°
available upon
request

JAZZ PROJECTORS IP65

TYPE

LED projector with COB technology for outdoor spot lighting.

CHARACTERISTICS

Sleek design that can be used in any setting; adjustable to 240°. Projector with base with integrated driver.

OPTICS

LED Chip on Board , high efficiency, Ra 85.
Adjustable from 0° to 240° on the vertical axis and 350° on the horizontal axis.

MATERIALS

Anthracite grey colour, powder coated anodised aluminium body.

* Subject to minimum order.

Dimmable (TRIAC, LEADING EDGE). Dimmers' list on www.duralamp.it

SPIKE LED

TYPE

Garden spike LED light: classic use with modern technology.

CHARACTERISTICS

Diffused light from a smaller point of origin: only 128mm above ground. Complete with an anti-glare cover.

MATERIALS

Die-cast aluminium body; epoxy painted metal body and spike.

NB

Do not use with drivers for halogen lamps; 12V AC/DC power supply not included.

Can be used with Duralamp's driver for LEDs:
SLD-50-24 MAX 3 light fixtures

SPIKE LED IP67

Orientable and almost invisible

OUTDOOR AND UNDERWATER PROJECTORS

ADJUSTABLE 180° FOR SWIMMING
POOLS AND FOUNTAINS

15W

18W

RGB VERSION CONTROLLED VIA DMX

RGB version controlled via DMX with integrated electronic controller: we recommend the WALL TOUCH panel, code ZKTPC-RGBW.

Without a control signal, the device goes into an automatic mode and cycles a sequence of pre-set colours.

SUBAQ

TYPE

IP68 projector for underwater and outdoor applications.

CHARACTERISTICS

Completely sealed projector for use in swimming pools and fountains. Swivel body mounted on a bracket and complete with surface fixing plate.

Free wires connection,.

MATERIALS

AISI 316 Stainless steel body and polycarbonate cover. Material resistant to chlorine and swimming pool additives.

NB

Operating Voltage: 12V, 50Hz LED driver not included. Do not use with dimmers. Max depth underwater: 5.0 mtr.

INGROUND WALK-ON IP67

TYPE

LED fixtures with SMD technology for inground installation; walk-on fixtures.

CHARACTERISTICS

Complete with finishing ring and completely sealed transparent glass.

MATERIALS

Metal body, brushed steel ring, shockproof IK10 glass screen; plastic sleeve.

NB

Do not use with drivers for halogen lamps; 12V AC/DC power supply not included.

PLAFO T2

TYPE

LED lamps with SMD technology in a fixture for ceiling or surface installations. Version with proximity sensor.

CHARACTERISTICS

Excellent light diffusion across the entire surface. Non-replaceable internal power supply.

MATERIALS

Metal body; satin effect plastic diffuser.

APPLICATIONS

Typically used in stairwells, apartment and residential building entrances, waiting rooms and surgeries, etc.

NB

Do not use with dimmers. Connection to the mains with terminal block.

Version with proximity sensor: ideal where increased visibility and safety is required obtaining the certainty of energy saving.

The sensor is housed inside a cover and is therefore invisible.

BULKHEAD T&O IP65

IP65	IK10
------	------

BASIC	25000h L70 B30
-------	-------------------

PRO	50000h L70 B20
-----	-------------------

ACCESSORIES

APPLICATIONS

Stairwell lighting, terraces, corridors, common areas, gardens, bathrooms etc.

BULKHEAD T&O IP65

TYPE

IP65 ceiling/wall light with new generation LED sources using SMD technology.

CHARACTERISTICS

Typically used for diffused lighting for both indoor and outdoor or wet environments (IP65). Substitutes ceiling fixtures with fluorescent lamps to give immediate lighting without flickering and increased duration.

MATERIALS

Shockproof plastic IK10 body and screen. Driver on board not accessible.

MOUNTING

The bracket attaches to the wall or the ceiling and the fixture is screwed onto the bracket.

NB

No Dimming. The 50.000 hour version is suitable for public tenders.

ZOE STEP-MARKER IP54

TYPE

Die-cast aluminium recessed step-marker.

CHARACTERISTICS

Extremely compact, indirect lighting, staggered reflective compartment to maximise flux and optics protected from insects.

MATERIAL

Powder coated die-cast aluminium in three different colours.

INSTALLATION

Recessed using the springs supplied.

APPLICATIONS

Step-marker. Ideal for use on stairs to improve safety.

Dimming curve expressed as a function of the load, i.e. inversely proportional to the percentage value of the power supply load.

If the product is used at full load, the dimming curve is linear from 10 to 100%, if it is used at half load, the dimming possibility is halved, i.e. a dimming on the control side of 50% will produce a real load dimming of 25%.

It is important to distribute the power evenly over the power supplies in the same area of the installation to achieve consistent dimming levels. It is important to distribute the power evenly over the power supplies in the same area of the installation to achieve consistent dimming levels.

CONTROL INTERFACE TO BE USED WITH DURA STRIP

Dimming and control systems can be used to improve the ambient aspect: they help creating special, different, soft and always lively atmospheres. Moreover, they have an important function of energy saving: by varying the emission and/or activating/deactivating the system or appliances, they allow optimising the presence of solar lighting.

It can be used with all White light Durastrips.

DALI INTERFACE

The DALI (Digital Addressable Lighting Interface) is a digital protocol interfacing with the power supplies. It is widely used in the lighting field as it provides visible benefits compared to the 1-10V analog control technology (it is essentially a flexible, digital control that allows addressing the single appliances).

The DALI protocol allows defining appliance units and managing the lighting sceneries, to create the right lighting of an ambient according to its use. Different lighting sceneries can be configured and enabled using a simple key, without involving the system wiring.

The DALI protocol is more simple and economic compared to the integrated management systems of a building (building management).

A DALI network can control up to 64 appliances/lamps.

1-10V DIMMING INTERFACE

The 1-10V luminous intensity control system

runs with analog technology: 1 corresponds to 0% and 10 to 100% of the lamp emission.

The intensity can be adjusted by using the linear curve or logarithmic curve and it is the simplest system to install.

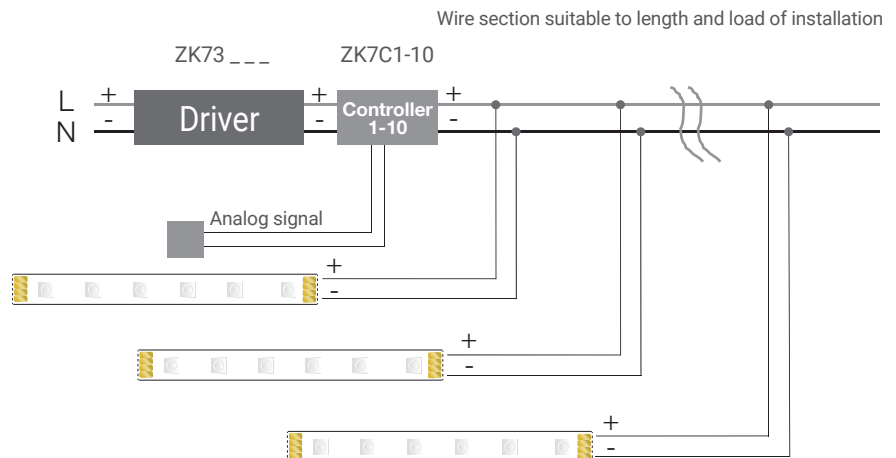

The connection is carried out by 2 polarity wires placed between the power supply and controller. It can be used with active or passive control systems.

DMX INTERFACE

DMX512, which abbreviation is DMX (Digital MultipleX), is a communication protocol mainly used to control lighting (even LED type), from computers or control units. It is normally used to control colored lighted or white lighted appliances (RGB) with variable temperature. Thanks to the high transmission speed of the data, the DMX allows making dynamic and even complex sceneries.

A DMX network consists in 512 channels; the number of appliances that can be controlled cannot be defined beforehand, as it depends on how many DMX channels each appliance uses. E.g., if every appliance of the DMX network uses 3 DMX channels, the network can contain 170 appliances.

ZKCDMX-R code version: Equipped with RJ45 connector for DMX signal, complete with looping system and remote sensor with plug (20 cm cable). It can be used in a traditional way or with remote control included in the packaging (signal distance 10 mt in free air).

WALL TOUCH DIMMER - DMX

TYPE

Dimmers for DURASTRIP white, for DURASTRIP CTC, DURASTRIP RGB and RGB+white.

CHARACTERISTIC

external interface in tempered glass with high touch sensibility, immediate response to touch and control precision. 4 zones can be controlled separately or synchronised. Conforms with protocol DMX512(1990). Can be used with ZKCDMX, ZKCDMX-R, ZKCDMXW. Dimmer's driver included in the box (220-240Vac / 5Vdc). Easy installation and intuitive use.

PLUG AND PLAY!

DMX WALL TOUCH DIMMER FOR WHITE LIGHT DURASTRIP

INFO AND TECHNICAL DATA

KEY

PRODUCT CATEGORY KEY

BASIC	Ideal products for markets of consumers who desire a LED product and are seeking the most convenient solution in terms of its cost.
PLUS	Articles with outstanding performance and the best quality-price ratio, the best solution for the majority of applications.
PRO	Products for specific applications and top-level features, especially appreciable by industry professionals.

LED WARRANTY SPECIFICATIONS KEY

Warranties on all LED fixtures and LED lamps:

G2 anni GARANZIA	Up to 2 years (4000h/year)*	*4000h = 11h a day x 365 days. Without limitations on the duration of use for the first year, provided the observance of the installation conditions.
G3 anni GARANZIA	Up to 3 years (4000h/year)*	*4000h = 11h a day x 365 days. Without limitations on the duration of use for the first year, provided the observance of the installation conditions.
G4/h24 anni GARANZIA	Full Guarantee 4 years (24h/24h)	h24, provides Total Warranty! The winning element for great projects.
G5/h24 anni GARANZIA	Full Guarantee 5 years (24h/24h)	h24, Total Warranty up to 5 years use!

The specific guarantee that each item enjoys is clearly indicated in the catalog and is subject to compliance to the limitations of use. For details, refer to www.duralamp.it or contact the sales force.

KEY

TABLE PAGES KEY

W	Rated watts for lamps or fixtures
V	Lamp or fixture voltage
lm	Lumen: unit of measurement of the flux emitted by a lamp or fixture. In the case of DURALAMP'S fixtures it indicates the real emission of the fixture in stable conditions. This data is the same used in the photo-metrics for lighting calculations.
K	K= Kelvin colour temperature indicated in Kelvin.
COLOUR NM	Colour in nanometres, unit of spatial measurement of wavelengths of visible/invisible radiation.
	Lamp cap
PF	Power Factor
	Beam opening
Ø/L1/L2/L3/H	Diameter and other dimensions expressed in mm except where otherwise indicated.
	Weight of single item article in grams (except where otherwise indicated)
	Minimum packaging: complying with packaging quantities when ordering speeds orders and ensures greater safety of goods.
	Minimum order quantity
	Class I Fixture- Fixture with protective earthing
	Class II Fixture – Fixture with double insulation, no earthing required
	Class III Fixture – Low voltage fixture, no earthing required
	Can be used in the open air, in open fixtures and without protective glass
	Only use in fixtures fitted with protective glass
	Elimination of UV rays.
	Do not cover with insulating material
	Can be used with a dimmer. A list of compatible dimmers is found in individual product files on the web site.
	Not to be used with a dimmer.
	Adjustable
UGRxx	UGRxx: Indicates the degree of glare: the lower the number, the lower the glare
Ra>XX	Colour Rendering Index
XX000h	Operating life in hours indicated as L70 or L50, always measured at 25° room temperature AT. The life-span is modified substantially with a rise in temperature.
	Updated tech. data

KEY

LX0	Operating life of a LED fixture or lamp maintaining the indicated flux: L70= 70% flux; L50= 50% flux.
IK08	IK Code, International Protection Marking, classifies and rates the degree of protection for light fixtures against external mechanical impact. IK01 0,15 Joule IK02 0,20 Joule IK03 0,35 Joule IK04 0,5 Joule IK05 0,7 Joule IK06 1,00 Joule IK07 2,00 Joule IK08 5,00 Joule IK09 10,00 Joule IK10 20,00 Joule
IPXX	IP Code, International Protection Marking, classifies and rates the degree of protection for light fixtures against the intrusion of solid particles (first number) and water (second number). IP20 protected against solid objects up to Ø 12 mm. IP23 protected against solid objects up to Ø 12 mm and sprays of water. IP40 protected against solid objects over Ø 1 mm. IP43 protected against solid objects over Ø 1 mm and sprays of water. IP44 protected against solid objects over Ø 1 mm and splashed water. IP54 protected against dust and splashed water. IP55 protected against dust and low pressure jets of water. IP65 Totally protected against dust and low pressure jets of water. IP66 Totally protected against dust and strong jets of water. IP67 Totally protected against dust and temporary immersion. IP68 Totally protected against dust and immersion in water (with an indication of the permitted depth in metres).
IPVI IPVO	IP rating of the internal housing side (VI) and Optic side IP rating (VO)

All measurements are expressed in mm except where expressly indicated.

NB

Available on order: the message "Available on order" often appears in the catalogue. We've added it to offer our customers the broadest choice option. Careful though: if an article is available "on order", it means that it is not readily available in stock and only minimum quantities are available for purchase. We therefore recommend that you contact sales for further details.

CERTIFIED QUALITY

All Duralamp products are CE marked, ie they comply with all applicable European Directives. The UL mark is issued after certification of the product by third parties such as UL, an independent, non-governmental and non-profit organisation whose mission is to ensure that products conform to standards set by ANSI, the American National Standards Institute. UL certification is therefore a Quality and Safety mark and is required for products to be used in the United States and countries that make reference to the same standards.

The EAC mark is the Euroasian Conformity mark required for exporting products to the Customs Union of Russia, Belarus, Armenia, Kazakhstan, Kyrgyzstan. It is comparable to the CE mark and refers to the declaration of compliancy to the technical standards required by the Eurasian Customs Union.

CERTIFIED COMPANY

Duralamp operates under ISO 9001, an international reference standard for quality management of all company processes.

TECHNICAL ANALYSIS

lm

FLUX AND EFFICIENCY

Luminous Flux and Efficiency represent the key information for the evaluation of the performance of a product. What do they represent exactly? Luminous flux represents the emission of the LED source, that is the total amount of light produced by the light source. Efficiency represents the ration between the emission and the power absorbed by the source, that is the total amount of emitted light divided per the energy consumed by the LED source. Nowadays there is not a sole way of publishing these data, each company on the market makes its own choice. This means that catalogues of different companies publish different kinds of information, ranging from the data declared by LED producers to values referable to the LED source in peculiar conditions, but also to values that take into account the "loss" due to reflectors, lenses, drivers and so on. In general, the most reliable data is the value measured on the fixture in its effective usage conditions. In order to let our customers have a clearer idea of the declared data, Duralamp specifies for each LED fixture both its effective flux/efficiency values and the values directly referable to the source, as declared by the producer. The purpose of this methodic choice is to simplify the understanding of the data, and, consequently, to provide our customer the immediate possibility of comparison among Duralamp lighting fixtures and those by other brands. The rapid technical progress of LED sources results in continuous changes in terms of luminous flux and, consequently, efficacy. The information provided by the catalogue should therefore be referred to the date of publication - for regularly updated information please visit the site web.

L70

LED LIFESPAN

LED lamps, unlike traditional lamps do not suddenly stop working but gradually decrease their initial flow unless there are defects or electric shocks. A LED lamp is considered to be no longer functioning it reaches 70% of their initial flow (L70). Life tests are performed following standard IES LM-80. The life span of LED lamps is strongly influenced by the lamps operating temperature once they are installed in fixtures. Duralamp fixtures are designed to have a very low LED operating temperature to ensure the lamps have a very long lifespan.

L80 B10

According to the IEC / PAS 62717 standard, the useful life of a LED can be defined with an additional parameter, for example 50'000h L80B10, meaning the period of time (50'000h) in which 10% (B10) of the LED products of the same type has gradually fallen below 80% of the initial nominal flux.

TC

TEMPERATURE AND PERFORMANCE

The working temperature of a LED source has a significant effect on its useful life, maintenance of luminous flux and efficiency. Correct temperature management, i.e. thermal management of the power in use is a crucial factor in ensuring the performance and reliability of products.

The main characteristic to determine reliability of a product and consistency of performance is measuring the junction temperature (Tj), that can be measured indirectly as luminous flux and the useful life are linked to this parameter. Tj values between 60°C and 90°C allow you to have products with high reliability, performance and estimated lifespans that adhere to market demands.

Careful attention must be paid when reading the declared data given that LED manufacturers provide data on the flux at a temperature of Tj 25°C, a condition that is not physically possible for normal use where the LED source is turned on and tested in a fraction of a second and does not produce any heat. Duralamp products are measured and characterised for thermal stability to provide real data on everyday use for the catalogue and users. Well-designed fixtures that ensure proper dissipation also ensure constant flow, colour and spectrum parameters as well as reliability and durability in the declared lifespan.

COLOUR CONSISTENCY

LED lamps have extensive production tolerances in relation to chromaticity. For years Duralamp has only used lamps with colour consistency that is measured using the MacAdam Ellipse system. This allows for absolute repeatability of the colour characteristics compared to the binning based system. LED lamps used by Duralamp are at least 3-steps of MacAdam (3SDCM).

Ra

COLOUR RENDERING INDEX CRI or Ra

The colour rendering index CRI indicates the ability of a light source to reveal colours faithfully. Lighting a coloured object with two sources with different CRI will reveal different colours depending on the source used. It is important not to confuse the CRI with data relating to the colour temperature of a source (expressed in K); two sources with the same colour temperature can have different colour rendering indexes. The CRI strongly influences the efficiency of a LED source and many times lighting designers have to

choose between the quality and quantity of light. The LED sources that are fitted in products in the Duralamp collection normally have a colour rendering index that reaches CRI 85. In some case there are also sources with a high colour rendering index (CRI>95).

TM30

New TM30 Standard - a more precise colour definition

It is evident that a single index is not sufficient to completely characterize the colour rendering of a source. The TM-30 is the method by which we group together well-known evaluation systems, organized in a systematic way, with the introduction of two other different indexes, the Fidelity Index Rf (which indicates the fidelity of colour rendering) and the Gamut Index Rg (used to evaluate the increase or decrease in saturation), in turn accompanied by a form of graphic representation. Furthermore the method evaluates the illuminant on 99 samples (CES) that reflect the colours of the leaves, flowers, skin tones, paintings, etc. so as to extend our ability to establish its specific rendering.

UGR

UGR

UGR (Unified Glare Rating) is a unified factor in the international field developed by the CIE (International Commission on Illumination) to evaluate direct discomfort glare due to the use of lighting products. In the European Standard relating to indoor workplaces UNI EN 12464-1, the UGR varies from a minimum value of 10 (no glare) to a maximum value of 30 (considerable glare). The lower the value the lower the glare. The UGR value needs to be calculated because it takes into account the size and characteristics of the environment, the background luminance (ceiling, wall, etc), the luminance of light fixtures and the position of the latter in relation to the observation point.

UGR classification applications

- <13 imperceptible
- ≤16 perceptible technical drawings
- ≤19 perceptible reading, writing, schools, offices, working on a pc
- ≤22 perceptible industry and crafts
- ≤25 uncomfortable raw industrial jobs
- ≤28 uncomfortable railway tracks, warehouses
- >28 intolerable

Flicker

Fixtures with the "SAFE FLICKER" logo have parameters of $P_{st}^{LM}=1$ and $SVM \leq 1$, in compliance with regulations IEC TR 61547-1 and IEC TR 63158, to ensure a more comfortable and safe light.

- **P_{st}^{LM} (Short-Term flicker)**

Quantifies visible Flicker that is harmful to human health caused by the modulation of light in the frequency range between 0.3Hz and 80Hz.

The recommended threshold is $P_{st}^{LM} = 1$.

Note – This value was determined based on a representative test group of people and identifies the average perception threshold of visible flicker.

- **SVM (Stroboscopic Visibility Measure)**

Quantifies stroboscopic effects that can occur in situations relating to objects in movement in the presence of modulation of light in the frequency range between 80Hz and 20KHz.

$SVM=1$ represents the visibility threshold in a test group of people that quantifies the stroboscopic effect in defined laboratory conditions.

Fixtures that do not bear the "SAFE FLICKER" logo on the other hand show the flicker value declared by the driver manufacturer which is not determined according to IEC criteria.

Constant renewal of drivers will bring about the introduction of new models in line with IEC requirements. For more details and/or specific needs please contact our technical department.

Technical details

Flicker is defined as “the rapid variation of the intensity of a light source over time”; in particular that relating to the frequency range between 0-80Hz.

When fluctuations on the other hand belong to the interval between 80Hz-2KHz this are called “Stroboscopic effects” in which light fluctuation produces an incorrect perception of the movement of objects lit by the same source by a static observer.

This phenomenon became increasingly important following the introduction of LED light sources for general lighting given the combination of the following aspects:

- LED sources are characterised by a high speed response to fluctuations in the power supply which translate into variations of the light emitted
- Unwanted residual fluctuations of the driving current of LED sources generated by the electronic power supplies used
- Modulation of the driving current of LED sources for example PWM (Pulse Width Modulation), necessary to adjust the emission level
- Any instability in the operation of dimmers connected externally to the LED source power supplies

This fluctuation in light intensity, according to the frequency, intensity, viewing angle, level of light in the environment, age of the observer and their sensitivity level, can be perceptible on a conscious and/or unconscious level and generate a series of side effects depending on the sensitivity level such as: headaches, visual fatigue, distraction etc.

In order to mitigate the risks on health in lighting contexts using LED sources, recommendations have been developed for the American market (see: IEEE Std 1789™-2015), and the European market with Technical Reports IEC TR 61547-1 and IEC TR 63158.

The graphic below summarises the limits provided for in the two different “regulations”, based on different evaluation mechanisms to establish when a fixture is “SAFE” for observers.

PHOTOMETRICS KEY

Photometric measurements were taken at the Duralamp Photometric Laboratory. These measurements are performed at a room temperature equal to 25 ± 1 °C as required by UNI EN 13032-1 - Light and lighting - Measurement and presentation of photometric data of lamps and luminaires - Part 1.

The photometric values quoted are dependent on the optical system to which they relate, and from the light source used. In order to improve its production, the Company reserves the right to change these optical systems and consequently relative photometric data without notice.

For ease of use, the photometric curve present within this catalogue is shown and explained below.

On the web site www.duralamp.it the special section "INFO TECH /Eulumdat" provides all the photometric data in ldt. format that is also given on every product datasheet.

The photometric curves shown in this catalogue are compiled according to the "C-γ" international reference system, where the C0-C180 plane is perpendicular to the fixtures and the C90-C270 plane is parallel to the fixtures, as depicted in the figure. For symmetrical and rotationally symmetrical fixtures therefore, a single curve is used.

GENERAL SALES CONDITIONS

1. Applicability

1.1 These general conditions (hereafter the "Conditions") constitute an integral and essential part of the contract of sale between the Parties. The Conditions shall regulate all legal relationships between Duralamp S.p.A. (hereafter "Duralamp") and the purchaser (hereafter the "Purchaser") where the said relationships are not disciplined by the applicable terms of the Italian Civil Code (C.C.). The nullity of any of the terms of these Conditions shall not prejudice the validity of the remaining Conditions or the Contract.

1.2 Any changes to these Conditions shall be agreed between the Parties in writing, with the exception of the provisions set down in article 1341 of the Italian C.C..

2. Sales

2.1 Sale requests for the products (hereafter the "Products") shall be accepted 'subject to the seller's approval' and shall be considered to be irrevocable in accordance with and as an effect of article 1329 of the C.C. for a period of 1 (one) month from the date of the order requesting execution without prior acknowledgement, pursuant to and as an effect of article 1327 of the C.C. from the date on which the order is received by Duralamp.

2.2 The Products detailed in the individual orders and the relevant accessories shall be supplied to the Purchaser by Duralamp with "Retention of Title" pursuant to and as an effect of articles 1523-1526 of the Italian C.C. In this case, the transfer of ownership of the Products to the Purchaser shall take place exclusively upon the full payment of the price agreed, whilst any risks shall be the responsibility of the Purchaser from the moment of delivery of the Products.

2.3 Whilst confirming the terms stated above, the Parties hereby agree that should the Products and relevant accessories be destroyed for causes not attributable to Duralamp, the Purchaser shall not be released from the obligation to pay for the same, even where the Products have not yet been delivered.

3. Prices

3.1 The prices detailed on the price list shall be applied to Product sales orders. The aforementioned prices shall be unit prices per single item, except where stated otherwise for certain Products. The Parties shall have the right to agree, in writing, any derogations and/or special conditions of sale.

3.2 Moreover, the Parties hereby agree that the following conditions shall be applied:

- (I) Minimum order: € 300 (three hundred) for Italy - € 750 (seven hundred and fifty) for other countries;
- (II) Delivery free to destination in Italy for orders of € 300 (three hundred) for Italy or more;
- (III) Ex-Works deliveries for other countries.

3.3 The prices given above do not include VAT and installation costs.

3.4 The prices provided in this catalogue shall be valid until a new price list is published.

4. Currency

All prices are given in Euros (exclusive of VAT). Invoices shall be drawn up in Euros.

5. Special requests

Products can be supplied to the Purchaser in non-standard colours and with special features. The relevant price, minimum quantities per order, methods and timing of deliveries shall be agreed in each individual case, in relation to the reference order.

6. Transport

6.1 Duralamp shall not be liable for any damage and/or losses which may occur during the transportation of the Products, unless the Products are delivered free at destination.

6.2 Duralamp shall have the right to establish the method of transportation to be used for the Products, unless the Parties have previously established a method of transport in writing.

6.3 Upon delivery, the Purchaser shall undertake to verify the condition of the products and shall make any complaints directly to the carrier and/or conduct any actions necessary in the event of loss, misplacement, removal or damage, or delays in transportation and/or the methods of delivery of the Products.

7. Complaints

7.1 In the event that the Products are found to have any faults and/or defects, the Purchaser shall undertake to notify Duralamp of the same in writing, by means of a registered letter, no later than 8 (eight) days following the discovery of the said faults and/or defects, at the risk of invalidating the obligations of the guarantee provided by Duralamp. In this case, the faulty Products, which should be reported within the terms established, should be returned to Duralamp, once the Purchaser has received specific permission to do so in writing.

7.2 In the event that the Purchaser's complaints are held to be valid, Duralamp, at its complete discretion, may make the necessary repairs and/or replace the Products, excluding the attribution of any further charges, obligations, indemnification or compensation to the same. The Products in question should be returned to the Duralamp S.p.A. plant in Via Pratese 164, 50145, Firenze, Italy. In the event that, following an inspection by Duralamp, the Products returned by the Purchaser are not found to be faulty and/or defective, Duralamp shall return the Products to the Purchaser, charging the same an amount equal to 15% (fifteen percent) of the value of the said Products.

8. Delivery

8.1 The Parties hereby agree that the terms established for the delivery of the Products shall not be considered absolute or essential and that, in any case, each item shall be exclusively in favor of Duralamp, unless otherwise agreed in writing between the Parties.

8.2 In the event of delayed delivery, once 15 (fifteen) days have passed since the agreed date, the Purchaser may send Duralamp written warning to complete the delivery within a further term of no more than 15 (fifteen) days from receipt of the same. In the event that Duralamp has not completed the delivery within this further term the Purchaser may withdraw from the order with regard to the Products that have not yet been delivered. In this case the Purchaser shall only be obliged to pay Duralamp for the Products actually delivered, excluding the payment of any further indemnification and/or compensation to the Purchaser.

8.3 Duralamp shall not be responsible for any other breaches, including the failure to deliver or delayed delivery of the Products, caused by events outside its reasonable control such as, purely by way of an example and not limited to the same: the failure to deliver or delayed delivery of manufacturing materials by Duralamp's suppliers, equipment breakdowns, strikes and other trade union action, electricity blackouts, suspension of or difficulties with transportation.

9. Payment

9.1 The price due shall be paid by the Purchaser according to the conditions and modalities set down in the order and, in any case, by means of payments made exclusively to "DURALAMP S.P.A."

9.2 Duralamp shall only recognize the validity of the payments when the same are made in compliance with the provisions of article 9.1 above. This means that amounts paid using any other method shall not be considered to be a payment in discharge of the Purchaser's obligations. The eventual acceptance by Duralamp of a bank draft or other trade bill shall only occur with the application of the proviso "under usual reserve".

9.3 In the event of delayed payment with respect to the terms agreed, the Parties hereby agree that bank interest shall be due to Duralamp at the current PRIME RATE increased by 3 points. Interest shall be applied as of right, with no obligation for Duralamp to send the Purchaser a formal notice to pay.

9.4 Moreover, in the event of a delay in payment of more than 15 (fifteen) days, Duralamp shall have the right to terminate the order as of right pursuant to article 1456 C.C., sending written notification of the same, barring compensation for any damage.

9.5 In the event that the Parties have agreed upon a method of payment by instalments for the Products, the failure to pay several instalments or just one instalment exceeding one eighth of the overall price of the Products, shall result in the loss of the Purchaser's right to pay in instalments and shall give Duralamp the right to request the remaining balance of the price or, alternatively, at its own discretion, to terminate the contract with immediate return of the Products and the acquisition of the instalments paid, as indemnification, barring the right to compensation for any damage sustained.

10. Guarantee

10.1 The Products provided by Duralamp shall be guaranteed for a period of 12 (twelve) months from the date of delivery against any manufacturing or material defects and/or faults and against any breakdowns not attributable to the Purchaser. Duralamp's only obligation and the Purchaser's right with regard to claims related to the guarantee shall be limited, as decided by Duralamp, to the replacement or repair of the defective or non-compliant product or the reimbursement of the price for the purchase of another product. Duralamp shall be granted a reasonable amount of time to repair or replace the product, or to make the previously authorized reimbursement. Any defective or non-compliant Products shall become the property of Duralamp as soon as they have been replaced or reimbursed.

10.2 The guarantee shall exclude any failures due to circumstances beyond the control of Duralamp (lightning, flooding, etc.), as well as any damage caused by the improper use of the Products and/or relevant accessories. Notwithstanding the above, Duralamp shall not be bound by the guarantee if the contested defects or non-compliances have occurred as a result of submitting the Products to resistance or environmental tests, the incorrect use of the same, or in the event that the use of or conditions of use of the Products is different from that indicated in the instructions and technical information, as a result of negligence, incorrect installation or accident, or if they derive from improper repairs, alterations, modifications, storage or transportation or by incorrect handling.

10.3 The Purchaser shall send the Products returned in accordance with the terms of the guarantee to the place indicated by Duralamp in compliance with the Duralamp policy regarding authorization to return materials in force at the time. In the event that the Products returned are found to be compliant or not faulty, the Purchaser shall pay the cost of returning the same as well as the cost of insuring, inspecting and handling the Products.

11. Limitation of Liability

11.1 With the sole exclusion of criminal intent and gross negligence, duralamp shall not be liable for loss of profits or savings, loss of reputation or goodwill, any direct, indirect, consequential or special damage that may derive from or be connected to the contract or sale of products or services by duralamp or by the use of the same of a contractual or extra-contractual nature or deriving from any other source, even where duralamp has been notified of or is aware of the possibility of such damage.

11.2 The limitations and exclusions stated in article 11 shall apply within the limits permitted by law.

12. Applicable law and place of jurisdiction

12.1 These Conditions and all the effects of the same shall be governed by Italian law. The Parties hereby agree that any disputes related to these Conditions shall refer to Italian jurisdiction to the exclusion of all others.

12.2 The exclusive place of jurisdiction shall be the registered offices of Duralamp S.p.A., with the express exclusion of any other competing places of jurisdiction.
